Reviews

The book is fantastic and great. It is definitely basic but shocks in the 50 percent in the pdf. Its been printed in an remarkably basic way and it is just soon after i finished reading this publication in which really changed me, change the way i believe.

THE BIOHACKING MANIFESTO: THE SCIENTIFIC BLUEPRINT FOR A LONG, HEALTHY AND HAPPY LIFE USING CUTTING EDGE ANTI-AGING AND NEUROSCIENCE BASED HACKS

Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.What exactly is biohacking ? Biohacking is just a fancy word for optimizing your own biological potential, and in the context of this brand new book from James Lee (author of The Methuselah Project) it means achieving this via - - Slowing the process of cellular aging to extend longevity - Whether by reducing oxidative stress, activating sirtuins, preventing inflammation or by just simply connecting with those around you (Having rich social connections with those around you is one of the strongest predictors of long life) - Understanding your own neurochemistry to enable you to address any underlying issues or dysfunction involving neurotransmitters such as serotonin, dopamine or even acetylcholine - Utilising the latest nootropic brain-boosting supplements and drugs to optimise memory and cognitive function - Never heard of racetams, EGCG, sulbutiamine or modafinil? Not for long. The Biohacking Manifesto is, at its heart, a compendium of Lee s previous books The Methuselah Project, Your Brain Electric and Brain Hacks. However rather than just cobble these together and slap on a new cover, he has headed back into the clinical trial papers and the latest research from cutting edge biotechs to discover some brand new exclusive material for this book. The Biohacking Manifesto includes - - An exhaustive coverage of the latest supplements including - curcumin, astaxanthin and nicotinamide riboside (to name a few) - A comprehensive guide to the fundamentals of neurochemistry, including a range of options for boosting neurotransmitters such as serotonin, dopamine and acetylcholine - An explanation of the various processes which underlie the aging process including - oxidative stress, inflammation and mitochondrial dysfunction - Everything you need to know if you...
