Not illustrated. 1915 Excerpt: . . . division next higher. 2 Various methods and tables have been devised to avoid the necessity of reducing the higher terms of Maya numbers to units of the first order. Of the former, that suggested by Mr. Bowditch (1910: pp. 302309) is probably the most serviceable. Of the tables Mr. Goodmans Archjeic Annual Calendar and Archseic Chronological Calendar (1897) are by far the best. By using either of the above the necessity of reducing the higher terms to units of the first order is obviated. On the other hand, the processes by means of which this is achieved in each case are far more complicated and less easy of comprehension than those of the method followed in this book, a method which from its simplicity might be termed perhaps the logical way, since it reduces all quantities to a primary unit, which is the same as the primary unit of the Maya calendar. This method was first devised by Prof. Ernst Torstemann, and has the advantage of being the most readily understood by the beginner, sufficient reason for its use in this book. Table XIII.
