Brand New Book ***** Print on Demand *****.Alfred Russel Wallace OM, FRS (1823 -1913) was a British naturalist, explorer, geographer, anthropologist and biologist. He did extensive fieldwork first in the Amazon River basin, and then in the Malay Archipelago. He is best known for independently proposing a theory of natural selection which prompted Charles Darwin to publish his own more developed theory sooner than intended. Wallace was considered the 19th century s leading expert on the geographical distribution of animal species and is sometimes called the father of biogeography. He advocated spiritualism and believed in a non-material origin for the higher mental faculties of humans. He was also a social activist and was thus critical of what he considered to be an unjust social and economic system in 19th century Britain. His *The Malay Archipelago* became one of the most popular journals of scientific exploration of the 19th century. His other substantial works include *Darwinism*, (1889) and *Is Mars Habitable?* (1907).
